Unconditioned Mountaineers Spill by Dozen

feet to turn in a time of 1:05.2

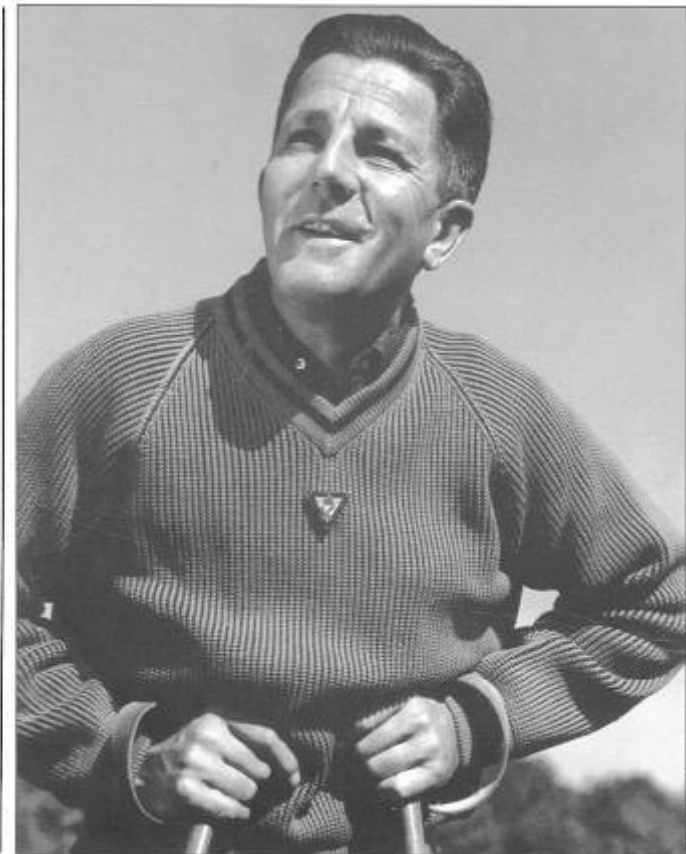

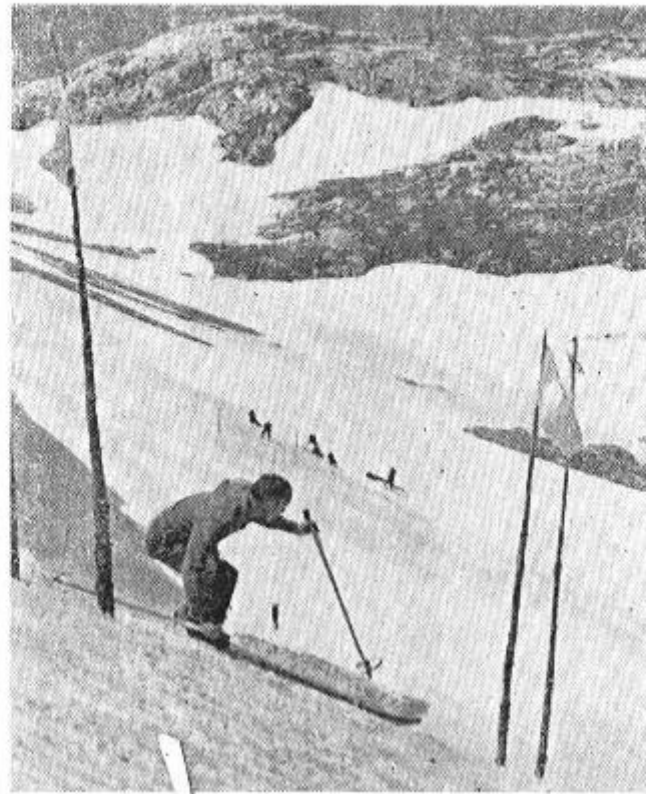

Some 500 Mountaineers who preferred to do their skiing viciously watched the contest from a snowless turf hummock which formed a natural grandstand at the foot of the course's final plunge. They had been brought most of the way in GI trucks, had clambered the last steep half mile over great rocks and turf that glistened with melted snow.

Between moments of action they admired the breath-taking panorama of the snow-streaked Julian Alps. Said one: "I'm sure glad we're up here to watch a ski race and not to dig Jerries out of those rocks."

Division Special Service, which planned and conducted the race, presented prizes to the first ten place-winners. The results:
